Order No:

Program assistant
initials:**All vaccine orders require:**

- A copy of your current 4 week fridge temperature log (up to present day)
- 1 calendar week prior to scheduled delivery date to fill the order.

Facility name:

Phone:

Ext:

Contact:

Email:

Date (mm/dd/yyyy):

Important reminders:

- Refer to ongoing Public Health Communications (e.g. Memos, **niagararegion.ca**) for the most up-to-date information regarding the timing of and details for the Influenza, RSV and COVID-19 vaccine (e.g. beginning and end of seasons, administration extensions, vaccine availability, etc.)
- Ensure your facility is compliant with monthly temperature log submissions to Public Health. This will help your facility to mitigate being put on hold for vaccine orders and avoid delaying vaccine administration to residents and staff.
- All vaccine orders will be delivered to your facility according to the vaccine delivery schedule
- Orders will be filled based on product availability. Do not delay COVID-19 or influenza vaccination to wait for a particular product, especially since supply may be unpredictable.
- Co-administration is encouraged to help mitigate the impacts of the respiratory season

General Vaccine

Vaccine	Trade name	Doses on hand	Doses requested
Pneumococcal 21-valent Conjugate ¹	Capvaxive®		
Td (Tetanus, diphtheria)	Td Adsorbed®		
Tdap (Tetanus, diphtheria, acellular pertussis) ²	Adacel® or Boostrix®		
Tuberculin (Mantoux tuberculin skin test/TST) ³	Tubersol®		
Zoster (Shingles) Publicly funded for eligible seniors 65-70 years of age.	Shingrix®		

- 1 Health Care Provider Fact Sheet: Pneumococcal Conjugate Vaccine for Individuals Aged 18 Years and Older (ontario.ca/page/vaccine-resources-professionals)
- 2 Adults 18 years of age and older (including those aged 65 years of age and older) who have not previously received Tdap vaccine are eligible to receive one publicly funded Tdap booster dose in lieu of their Td booster
- 3 Tuberculin skin tests are publicly funded for individuals in Ontario who meet the **eligibility criteria** (niagararegion.ca/health/professionals/report-diseases/tuberculin-skin-test.aspx). Coverage for documentation of skin test, such as completion of an immunization status report, depends on the reason for the test.

Resources	Reasoning	Amount requested

COVID-19 Vaccine

Facility name:

Phone:

Ext:

Submit additional order forms and temperature logs for subsequent clinic dates.

Current COVID-19 vaccine providers must document doses administered according to the professional standards of practice by the administering professional. Documentation is expected to be completed in Panorama Guided Workflow (PGW) after its launch. Vaccine may be moved in a frozen state from Public Health and will need to be thawed prior to administration. Never freeze COVID-19 vaccine after receiving your supply.

COVID-19 vaccine should not routinely be transported, except under exceptional circumstances based on a risk assessment, follow **Ministry of Health COVID-19 Vaccine Storage and Handling guidance** (ontario.ca/page/covid-19-vaccine-program).

Vaccine	Trade Name	Doses on hand	Doses requested
COVID-19 • 12 years of age and older	Moderna Spikevax 50 mcg/0.5 mL or Pfizer-BioNTech Comirnaty 30 mcg/0.3 mL		

- Follow Ministry of Health guidance for fall 2026 and spring 2027 COVID-19 vaccine administration
- Refer to the Ministry of Health **COVID 19 Vaccine Program** (ontario.ca/page/covid-19-vaccine-program)
